Fefol Duodenal®

ففول، مکمل زندگی

خانواده ففول، مکمل خانواده شماست

Product Introduction

Fefol Duodenal

is an exceptional iron supplement combining bisglycinate iron with essential vitamins B6, B12, and C to deliver rapid and effective iron absorption. With its special formulation, this product not only provides the necessary iron for the body but also prevents common gastrointestinal side effects of iron supplements and quickly restores hemoglobin levels to normal.

Key Features of the Product:

- Helps prevent and treat iron deficiency anemia
- Prevents anemia due to vitamin B12 deficiency
- Suitable for individuals with severe anemia
- Suitable for cancer patients
- Suitable for those with chronic bleeding or gastrointestinal diseases
- No nausea caused by iron tablets on the market
- Improves immune system function
- Helps increase energy

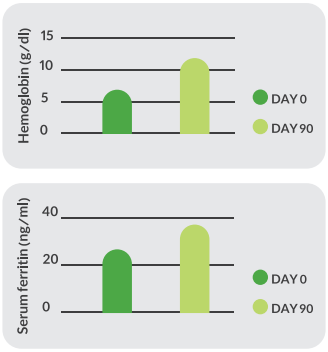

Competitive Advantages:

- Slow release
- Enteric Coated
- Contains synergistic compounds to improve absorption of vitamins and other nutrients
- Granulated formulation
- No interference with food and stomach acid
- Promotes better digestion
- Suitable for cancer patients

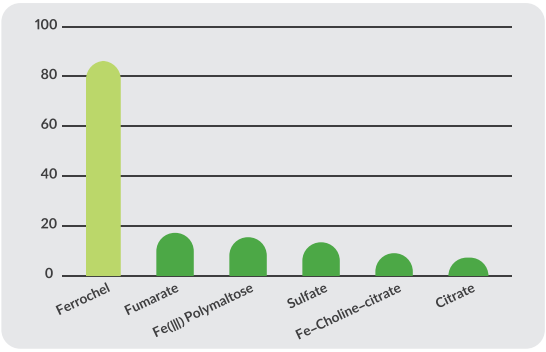

Ingredients and Special Properties:

1. Iron in the form of Ferrous Bisglycinate

- Approximately 70% more absorbed compared to other forms of iron
- Highly effective in increasing hemoglobin and ferritin levels.
- In iron bisglycinate, iron is tightly bound to two glycine amino acids. This strong bond makes iron more resistant to the effects of substances that usually reduce its absorption (such as phytates, fibers, or other metals).
- Reduces the need for high doses of iron supplements.
- Gentle and well–tolerated by the digestive system.
- An ideal choice for patients with gastrointestinal sensitivities or malabsorption disorders requiring highly absorbable supplements.

Evaluation of Changes in Hemoglobin and Serum Ferritin Over Three Months After Consuming Bisglycinate Iron

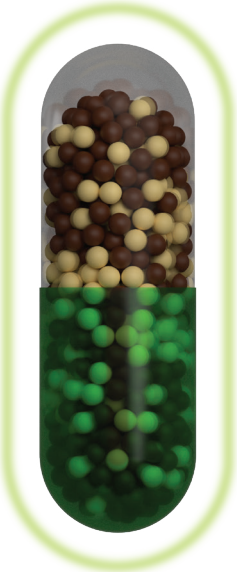

The relevant chart shows the relative absorption of different iron compounds, and the difference in absorption of Ferrochel (iron in the form of bisglycinate) compared to other iron forms is clearly visible

2.Unique Combination with Vitamins

The combination of vitamin B6, vitamin B12, and vitamin C in Fefol Duodenal not only helps with better iron absorption but also improves hemoglobin production, boosts the immune system, and reduces anemia symptoms such as fatigue and weakness.

Indications:

- Athletes
- Suitable for individuals with long-term bleeding or iron absorption disorders

Supplement Facts

Serving Size: 1 capsule
Servings Per Container: 30

	Amount Per Serving	% Daily Value
Iron as Ferrous Bisglycinate (Ferrochel®)	80 mg	444%
Vit B6	2 mg	100%
Vit B12	30 mcg	500%
Vit C	120 mg	200%
